## **MedWand™ Solutions, Inc. Welcomes NEW Vice President to Accelerate its Growth and Expansion Plans**

*Michael M. Kurliand, MS BSN RN-BC Joins MedWand  
as VP of Clinical Quality and Integration*

**(Rancho Santa Margarita, CA) September 23, 2022** – Leading the way in delivering virtual healthcare technologies for clinicians and patients, [MedWand™ Solutions](https://www.medwand.com), is pleased to announce **Michael M. Kurliand, MS BSN RN-BC** has joined MedWand's executive team as Vice President of Clinical Quality and Integration. In his role, Michael will work closely with clinicians, administrators, payers, and policy influencers, to help advance the adoption and integration of MedWand in models of care that span the health continuum.

“As an experienced senior healthcare leader and distinguished telehealth, and digital health expert with a deep understanding of the importance of quality care, Mike brings a unique understanding of the industry to MedWand,” shared Robert Rose, MedWand CEO and President. “We are very honored to welcome him to the team as MedWand’s new VP of Clinical Quality and Integration.”

Samir Qamar, MD, MedWand Co-Founder and Chief Medical Officer shared, “The strength of any health tech company can be gauged by the strength of its clinician executives. We are privileged to have Mike join MedWand, where his telehealth experience and philosophies will be welcomed with enthusiasm.”

A veteran healthcare professional, Mike started his career as an oncology and emergency psych nurse in Philadelphia. He made the leap to health information technology and has worked at prestigious children’s and older adult missioned organizations, Nemours Children’s Hospital, Children’s Hospital of Philadelphia and West Health. Michael has also been a member of the California Telehealth Coalition since 2017 when he moved to San Diego.

Named as one of the [250+ Health great leaders in health IT, revenue cycle to know](#) by Becker’s Hospital Review, Mike will continue to serve on the [California Telehealth Policy Coalition](#) and kick-off his role with MedWand by speaking on three panels at [Becker’s Health IT + Digital Health + RCM Annual Meeting: The Future of Business and Clinical Technologies](#).

“I’m honored to join the talented team at MedWand and look forward further building on the great foundation already established,” shared Kurliand. “Patients, clinicians, and payers all know healthcare delivery models have to evolve. Outcomes clearly have to improve, and that has to be done in an environment where costs are dangerously close to becoming untenable – all while we have a growing medically complex population, but fewer clinicians. Telehealth has to continue to advance and be one of the many needed solutions to address these problems. Easy to use tools that allow a more complete remote exam is vital to telehealth’s success. MedWand helps address these pressing needs.”

This summer, MedWand recently achieved 510(k) clearance and is now commercially available. Poised to transform remote care, MedWand enables clinicians to conduct a more comprehensive assessment of a patient’s health in real-time or store-and-forward.

To connect with MedWand’s new VP of Clinical Quality and Integration, request a demo with MedWand, or learn more information visit [www.medwand.com](http://www.medwand.com). When patient care depends on telehealth, choose MedWand.
